

The background of the cover is a photograph of a large, modern bridge structure, possibly a cable-stayed bridge, extending over a body of water. The bridge's massive concrete piers and the network of stay cables are silhouetted against a bright, hazy sky, likely at dawn or dusk. The water in the foreground is dark and reflects the bridge's structure. The overall mood is one of engineering grandeur and natural beauty.

## Papers

<i>Lifelines: A Ministry of Transportation and Highways Perspective</i>	Turgut Ersoy.....1
<i>Seismic design of New Westminster rapid transit tunnel</i>	Li Yan and David Siu.....9
<i>Seismic safety retrofit of Pitt River bridges</i>	M. Uthayakumar and E. Naesgaard.....21
<i>Locating the Jamuna river crossing of a 230 kV electrical transmission line in Bangladesh</i>	Victor A. Sowa.....33
<i>Seismic evaluation and retrofit of a major electrical transmission crossing at Annacis Island</i>	Blain Good, Tonia Jurbin, and Peter Gaffran.....47
<i>Ground improvement for seismic upgrading of lifeline facilities</i>	Kevin Nelson, Dharma Wijewickreme, and Upul Atukorala.....57
<i>The effect of drainage condition on liquefaction response of slopes and the inference for lifelines</i>	Ehsanollah Atigh and Peter M. Byrne.....67
<i>Use of geotechnical information for pipeline system analyses</i>	Donald Ballantyne.....77
<i>Geotechnical design and construction aspects of the City of Vancouver Dedicated Fire Protection System</i>	Lloyd Bie, Upul Atukorala, Muthucumarasamy Yogendrakumar, and Trevor Fitzell.....87
<i>Seismic lifeline study of Greater Vancouver Water District system and assessment of Second Narrows watermain crossings</i>	Dan Zavoral and Frank Huber.....95
<i>Seismic upgrading of the BC Gas Fraser Gate station</i>	Allen Mitchell, Dharma Wijewickreme, and Trevor Fitzell.....109
<i>Response of underground cable duct systems to travelling seismic waves</i>	W. Blair Gohl, Takashi Kojima, W. Scott Dunbar, and Michael K. Lee.....117
<i>Earthquakes and Vancouver tunnels</i>	Duncan C. Wyllie and Stephen V.L. Barrett.....127
<i>Geotechnical considerations in trench design for lifelines</i>	Brian E. Hall and Michael M. Eivemark.....137

*The Vancouver Geotechnical Society (VGS), a local chapter of the Canadian Geotechnical Society (CGS), is a non-profit organization dedicated to the dissemination of geotechnical information for the local Civil Engineering community. In addition to the annual one-day symposium, regular evening seminars are held from September through May. For further information on the activities of the VGS, visit the CGS web page at:*

<http://www.cgs.ca>
